

# EXPERIENCE MAKERS<sub>ON TOUR</sub>

**Il potere dei dati:  
cosa significa Customer  
Experience data-driven**

# First came personalisation

## First came personalisation

## Then comes personalisation at SCALE

# And we want to do it because it drives measurable results

**10-15%**  
Revenue growth<sup>1</sup>

**2x**  
Increase in ROI<sup>2</sup>

**20-30%**  
Customer satisfaction lift<sup>1</sup>

**10-20%**  
Reduction in marketing and sales cost<sup>3</sup>

**6-10%**  
Decrease in cost to serve customers<sup>4</sup>

**Hyper personalisation creates a distinct competitive advantage,  
enabling leaders to capture greater market share**

**Real-time  
customer  
data**

**Content supply  
chain**

**Seamless  
customer  
journeys**

**Making data driven experiences**

# There are many challenges to achieving this

Data and processes are **siloed** and **unavailable** for activation and **analysis**

Consumers are increasingly concerned with **privacy**

Highly complex and **disjointed** content workflows

Orchestration is **siloed** and batch oriented

Analysis is **not available** at a customer level to non data-scientists

# But Adobe can help meet many of these challenges

## Personalised experiences

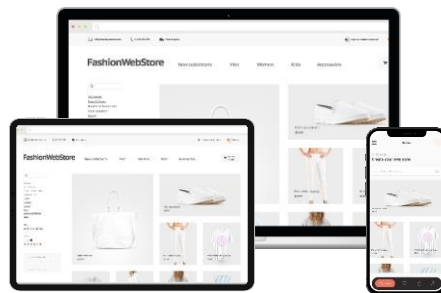

Delivering the right experience at the right time to every customer in the right context and channel

### Unified Data & Insights

Real-time 360 customer data & signals  
Responsible data management  
AI/ML predictive models/algos

### Content & Collaboration

Streamlined content creation & workflow  
Modular content, intelligently assembled  
Seamless content re-use

### Orchestrated Journeys

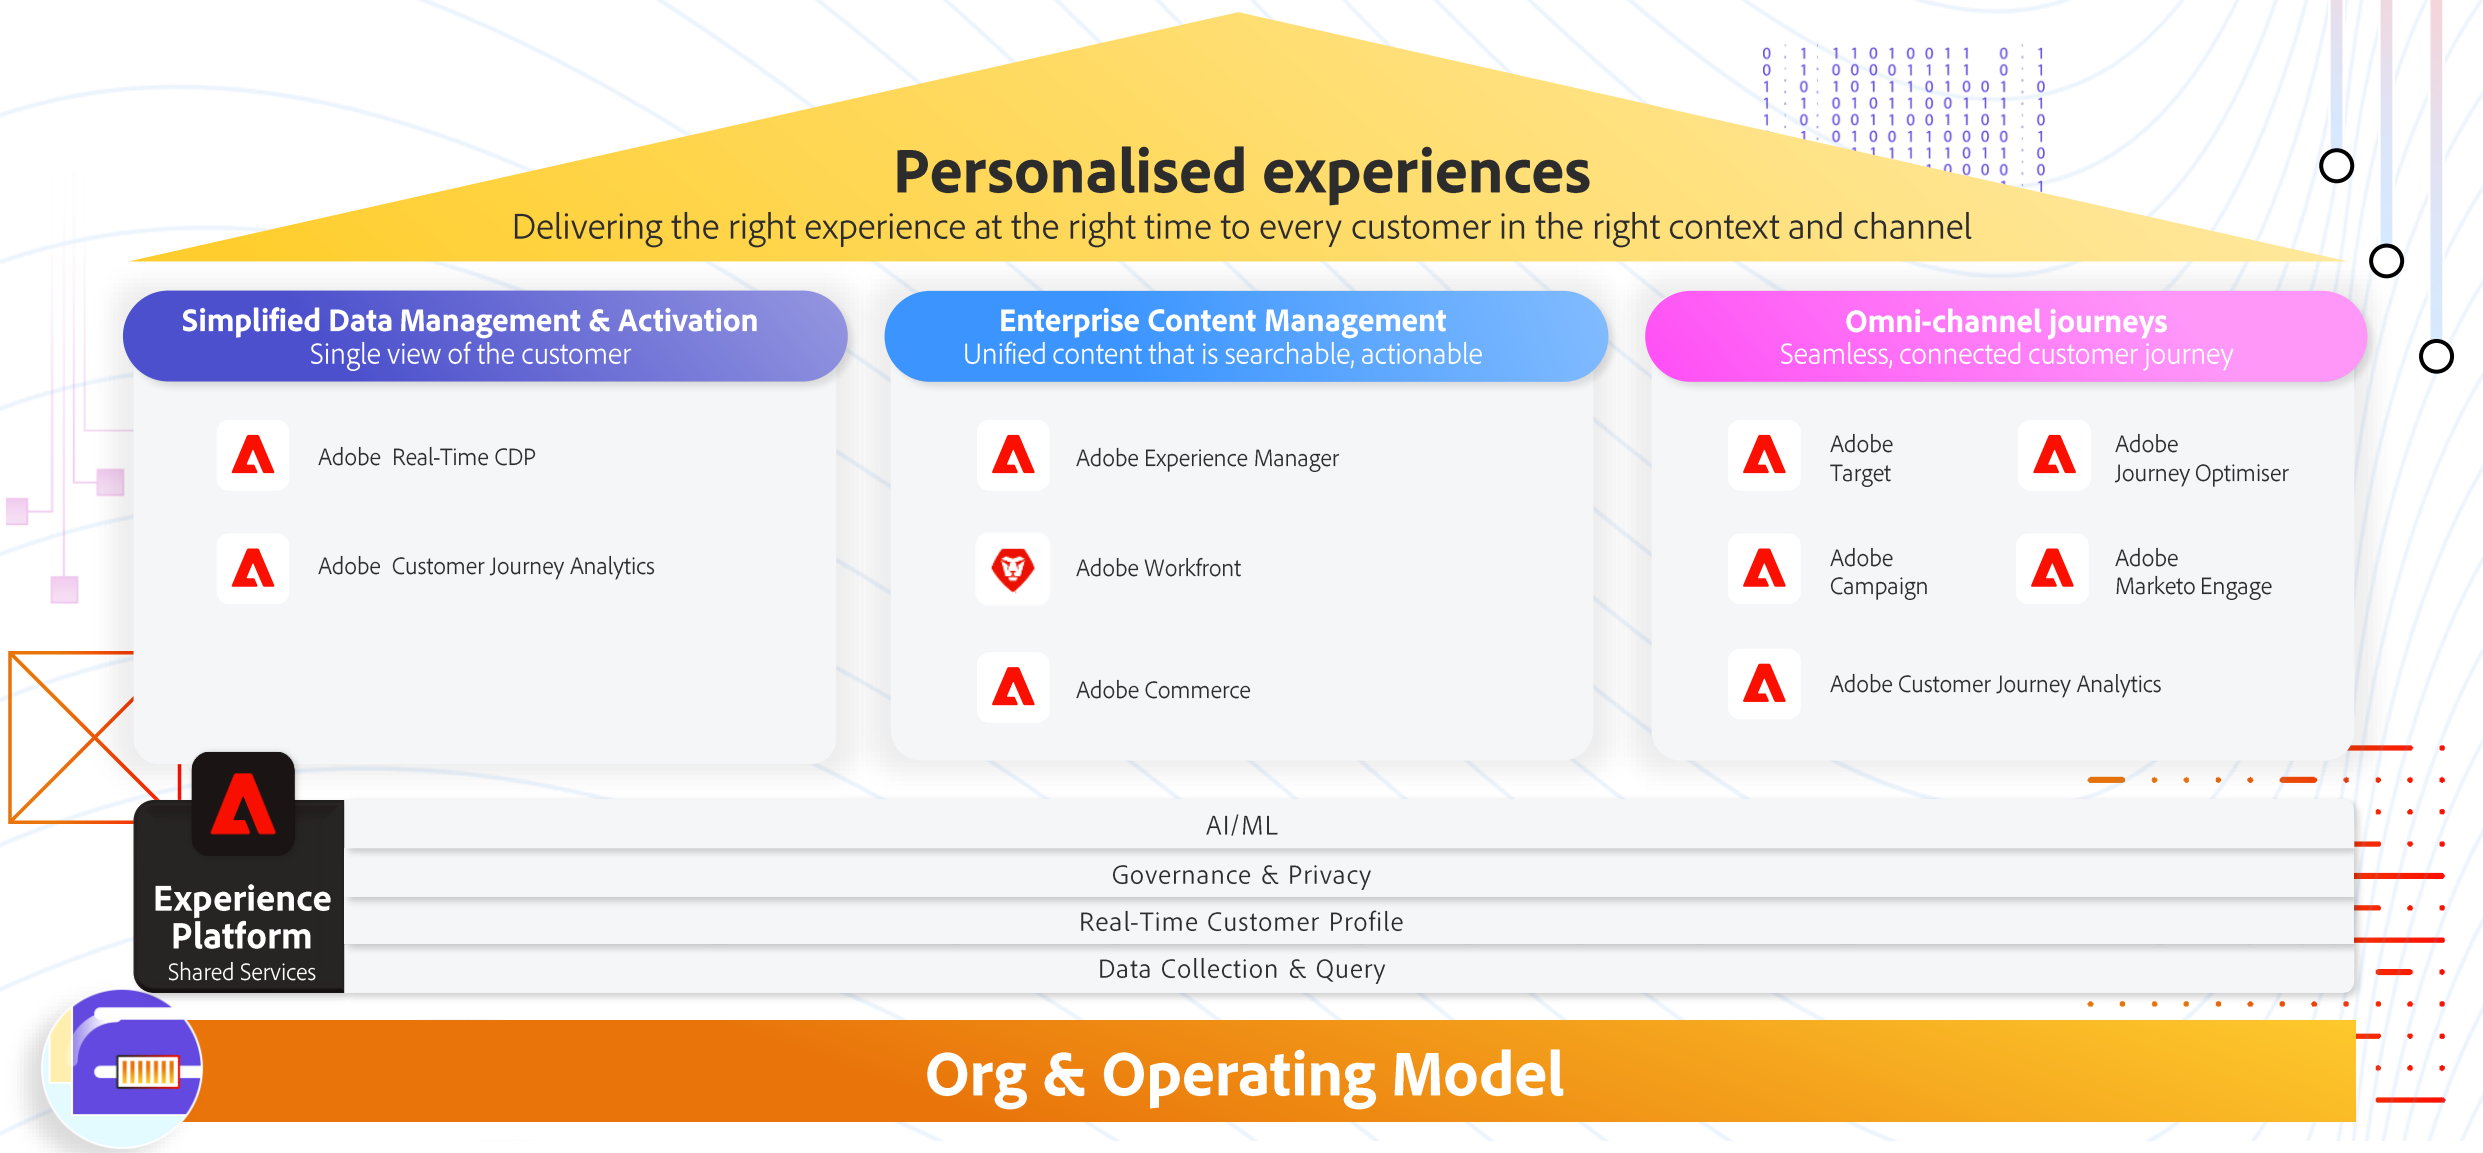

Coordinated cross-channel journeys  
Real-time, behavior-triggered, contextual  
Advanced decisioning/next best experience

## Org & Operating Model

# But Adobe can help meet many of these challenges

# Data driven experiences needs a solid data foundation°

Connect all the data from all relevant sources into **unified** profiles and audiences

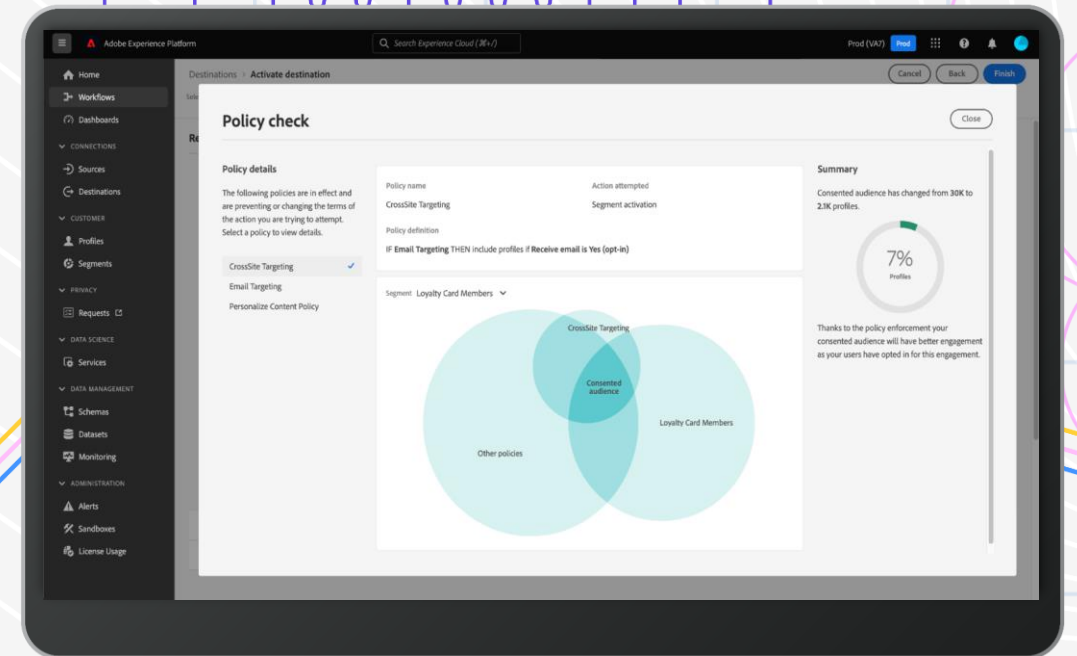

**Real-time** customer decisions at scale with **deep insights** from unified cross-channel data

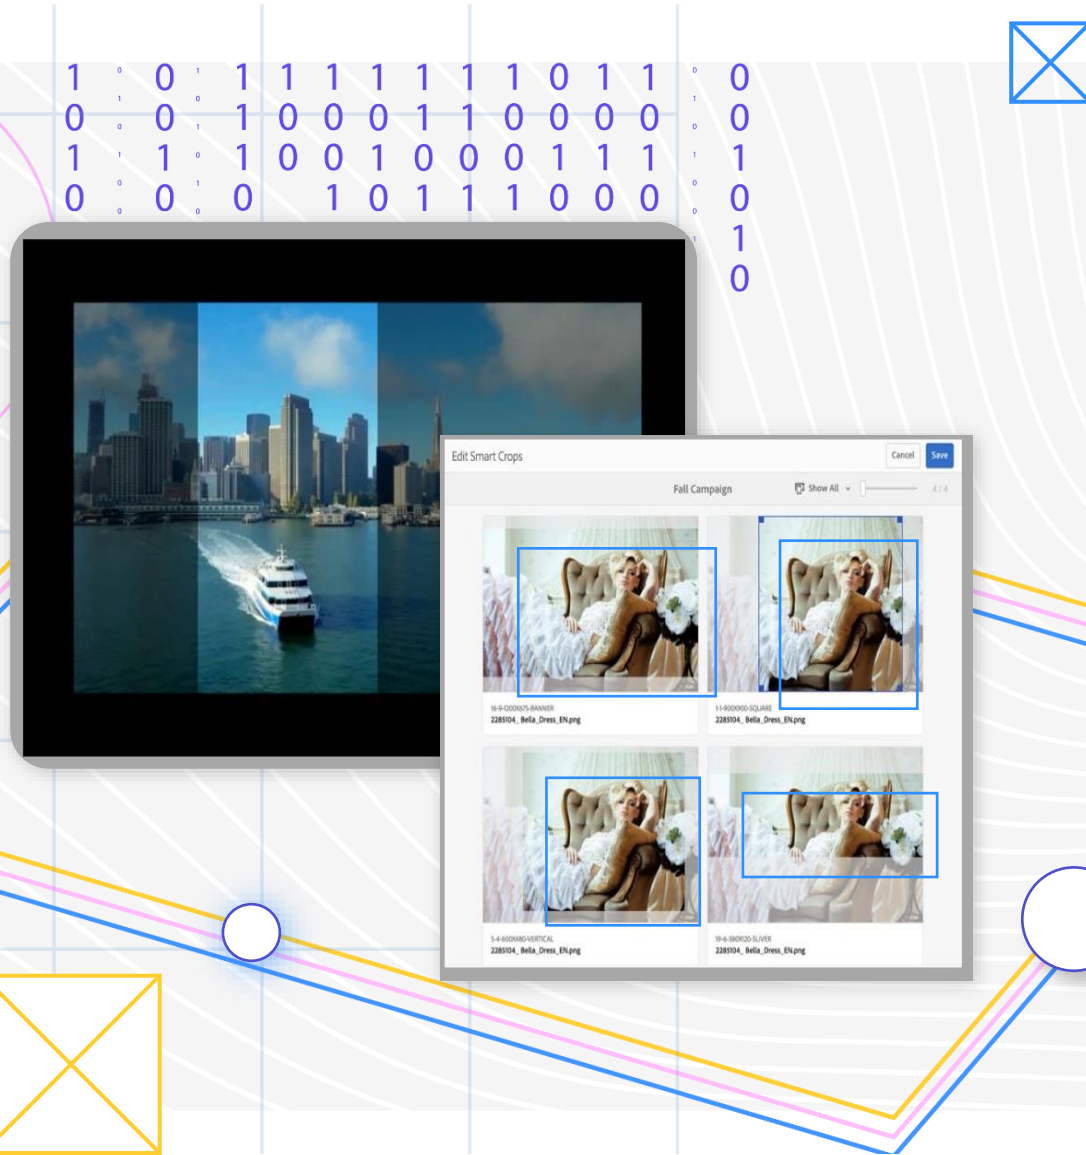

Govern all data properly and ensure **compliance** with regulations and customer expectations

Activate in the **right time** and **right place** for you and your customer

# Data without content is not an experience

Connect all phases of content production – from planning to creation to delivery

**Create** experiences one and personalise for any channel, touch-point or audience

Establish a single source of truth for all content and experience management

Speed to launch, pivot with agility and increase ROI with content tailored to your audiences

# Which then needs to be connected and contextual everywhere

Using the unified profile to personalise across websites, channel, apps and campaigns

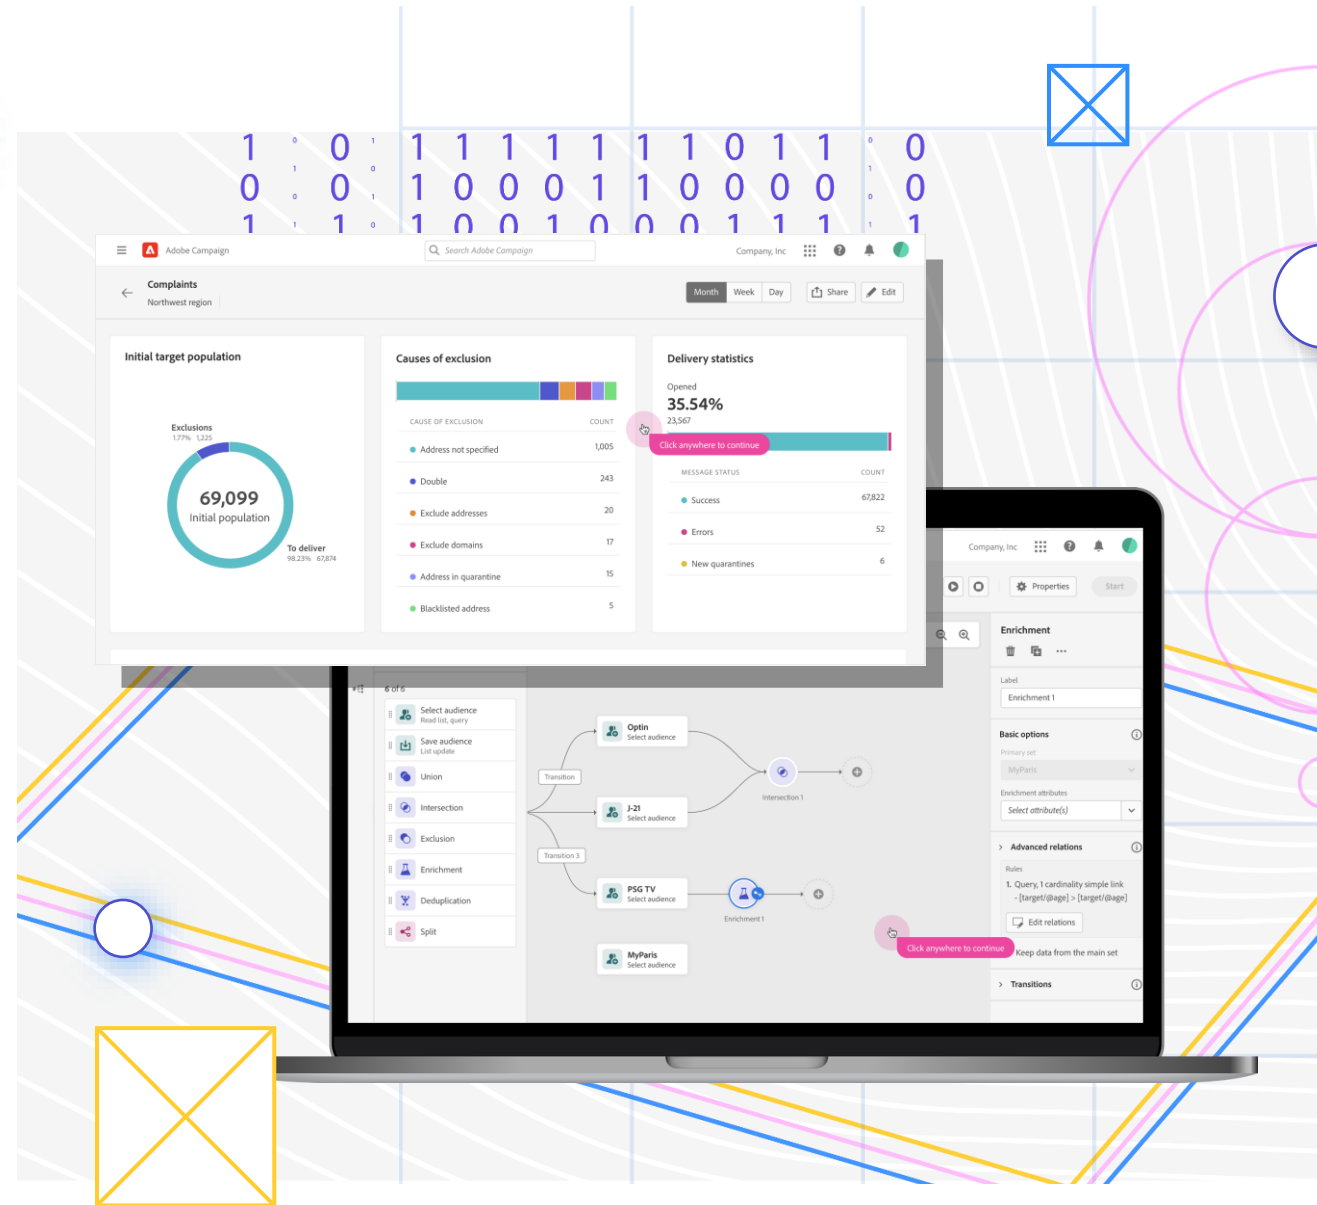

Leverage AI/ML to better react to real-time insights and customer behaviour at scale

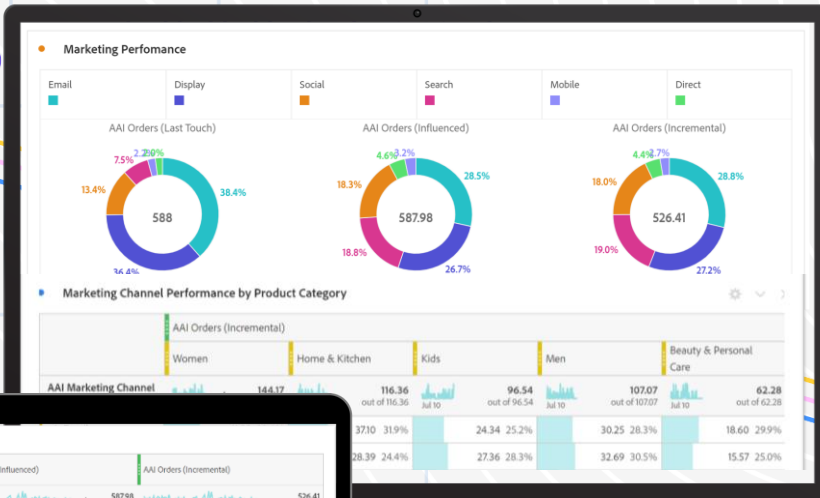

Ensure consistency of content and offers across all channels – inbound and outbound

Create consistency to increase satisfaction, conversion, retention and brand affinity

# And bringing this together requires deep holistic insight

**See holistic journeys.** Unleash siloed data and insights with a complete, sequential customer view across online and offline events

**Ask more of your data.** Rapidly query a comprehensive dataset, inclusive of historical data, in an easy-to-use interface that doesn't require SQL

**Democratise insights.** Enable anyone responsible for the customer experience to make confident, data-driven decisions and optimisations.

**Act quickly and drive impact.** Out-clock alternative processes, getting insights in minutes and seamlessly publishing for activation

# Adobe offers an integrated platform to deliver hyper-personalisation

Data to drive insights, segments, activations, reporting and even content variation

With orchestration to drive a consistent experience on any touchpoint

Comes together to create delightful moments for customers, at a lower TCO for you

# More on this and so much else at Adobe Summit

## Sensei GenAI Services

Sensei is growing. Building on a decade of Adobe ML and AI technology that operates across the Adobe platform

Taking GenAI content and pushing it through our model pipeline to create truly innovative content – 3D, vectors, videos and more

## Firefly

A family of Adobe generative AI models specifically created for content generation for creative output

Built from the ground up to be deeply integrated into application and content workflows

Open beta – sign up now!

## Product Analytics

A new way for organizations to enable product teams with insight on the whole customer journey

Product teams self-serve and quickly have insights that show product contribution to business outcomes

## Audience Analytics

Analyse Adobe Experience Platform generated audiences wherever they are activated – Real-time CDP or Adobe Journey Optimizer.

Creating a virtuous cycle of precision insights for activation and journey outcomes
