

Intelligent document management for modern government agencies.

Extending the impact of existing agency solutions.

With built-in integrations, APIs, and Microsoft Power Platform connectors, agencies have more options than ever to maximize operational efficiency with digital document management tools from Adobe and Microsoft.

- Rich integrations for Microsoft 365 apps such as Microsoft Teams, Word, and SharePoint
- Adobe Acrobat Services APIs, including PDF Extract and PDF Accessibility
- Low-code/no-code connectors for Microsoft Power Automate and Microsoft Power Apps

Agencies are under pressure to deliver better citizen and employee experiences, often while managing limited budgets and legacy infrastructure. These plug-in tools offer a path to improve services and streamline operations using familiar productivity solutions many agencies already have at their disposal.

Boost productivity with Adobe Acrobat Services APIs and Adobe connectors in Microsoft Power Automate.

Included with Adobe Document Cloud.

- Generate documents from Microsoft Power App forms or Word templates.
- Send a selected file in Microsoft SharePoint for signature, and automatically store signed documents.
- Convert PDF files to Microsoft Excel in Microsoft SharePoint.
- Extract PDF content into JSON, XLSX, and PNG.
- Automatically tag PDFs for greater accessibility.
- Apply security controls to restrict viewing, copying, and editing.
- Enable sending by authorized users on behalf of others.
- Dynamically route documents for signature based on data and Microsoft Azure AD profiles.

Intelligent tools at your service.

Adobe Sensei

Speed up form-based processes while reducing errors with Adobe's artificial intelligence technology, giving your staff more time for higher-value tasks.

- Automate form field recognition.
- Auto-clean scanned documents.
- Extract content from native and scanned PDFs.
- Improve accessibility at scale with automatic tagging.

FedRAMP Authorized options for government agencies.

Adobe's leading e-signature offering, Adobe Acrobat Sign, is available in Commercial (Li-SaaS/Tailored) and FedRAMP Moderate Authorized instances, so that agencies can choose the level of security control that best meets the needs of their specific use cases.
